

UTAM BOARD OF TRUSTEES AND ASSOCIATE MEMBERS

UTAM BOARD OF TRUSTEES

Sandy Abramson -- AT&T Corp. (President)
Peter Murray -- Ericsson Inc. (Vice President)
Ben Guderian -- SpectraLink Corporation (Secretary)
Ron Cross -- NorTel (Treasurer)
Lucia Chaudron -- Harris Digital Telephone Systems
James Caile -- Motorola, Inc.
Paul Weismantel -- NEC America
Anna Miller -- Omnipoint Corporation
Steve Sivitz -- PCSI
Peter Kozdon -- Siemens Rolm Communications Inc.
Andrew Zidel -- Sony Corporation of America

UTAM ASSOCIATE MEMBERS (as of December 1995)

Alcatel Network Systems
American PCSLP
Andrew Corporation
Association of American Railroads
BellSouth Wireless Inc.
California Microwave Telecom
Columbia Spectrum Management
Communications Certification Laboratory
CTP Systems
Digital Microwave Corporation
Harris Corporation
Hewlett-Packard Company
Hitachi Telecom
Iwatsu America, Inc.
MCC Panasonic
Mitel Corporation
Moffet, Larson & Johnson, Inc.
Nokia Mobil Phones
Pacific Telecom
PathNet, Inc.
PCIA/Naber
Plantronics
PTI Communications
Rockwell International
Sprint

- 2 -

South Western Bell
Tadiran Electronic Industries, Inc.
US West Communications
UTC

APPENDIX E

UTAM SUBCOMMITTEES

The following identifies the UTAM subcommittees and the issues over which each has oversight responsibilities. Parties interested in participating in any of the subcommittees should contact Deborah Aubrey Brimmer at (202) 429-6565.

Certification Subcommittee. This Subcommittee was responsible for developing the request for proposal for the certification review body needed to test unlicensed PCS devices for compliance with Part 15 requirements. It evaluated the responses and chose Communications Certification Laboratory ("CCL") as the review body. This Subcommittee was also responsible for establishing the Certification Procedures and Disablement and Location Verification Process ("LVP") requirements necessary for coordinatable deployment.

Database Subcommittee. The main responsibility of the Database Subcommittee is the development and implementation of a database management system ("DBMS") that will fulfill UTAM's deployment and relocation needs. Members drafted the request for proposal, evaluated the responses received, and recommended the selection of a vendor to the Board of Trustees. After Board approval, the Subcommittee worked to complete the contract with the DBMS developer. The DBMS is now operational, and the Subcommittee is developing enhancements to make the system more user-friendly.

Operations Subcommittee. The Operations Subcommittee is charged with developing the UTAM policies and operations procedures for microwave relocation. Current tasks include considering cost sharing issues, selecting a test link for relocation, and working with the Market Subcommittee to establish the link relocation priorities. The Technical Subcommittee was merged into the Operations Subcommittee. Therefore, the Operations Subcommittee is now responsible for determining all technical parameters and procedures related to PCS/microwave spectrum sharing. It also works with the Prime Frequency Coordinator on coordination activities and the development and implementation of PCS procedures.

Market Subcommittee. The Market Subcommittee is responsible for the development of the clearing fee collection mechanism, the prioritization of microwave links for the relocation of microwave links, and UTAM's outreach activities. It also is the forum for handling deployment-related concerns and for coordinating UTAM outreach and publicizing activities. This Subcommittee was also responsible for revising the Subscriber Agreement.
